Theoretica Chimica Acta

A Journal for
Structure, Dynamics and Radiation

Volume 73 1988

EDITORS

Klaus Ruedenberg, Editor in Chief
Ames Laboratory USDOE and Department of Chemistry, Iowa State University, Ames, IA 50011, USA

David Chandler
Chemistry Department
University of California
Berkeley, CA 94720, USA

Ernest R. Davidson
Chemistry Department
University of Indiana
Bloomington, IN 47401, USA

Nicholas C. Handy
University Chemical Laboratory
Lensfield Road
Cambridge CB2 1EW, England

Joshua Jortner
Institute of Chemistry
Tel Aviv University
Ramat Aviv, Tel Aviv, Israel

Werner Kutzelnigg
Theoretical Chemistry Institute
Ruhr University
4630 Bochum 1, FRG

Josef Michl
Chemistry Department
University of Texas
Austin, TX 78712-1167, USA

William H. Miller
Chemistry Department
University of California
Berkeley, CA 94720, USA

Keiji Morokuma
Institute for Molecular Science
Myodaiji
Okazaki 444, Japan

Björn O. Roos
Department of Theoretical Chemistry
Chemical Centre, P. O. Box 124
University of Lund
S-22100 Lund, Sweden

Henry F. Schaefer III
Chemistry Department
University of Georgia
Athens, GA 30602, USA

Donald G. Truhlar
Chemistry Department
University of Minnesota
Minneapolis, MN 55455, USA

ADVISORY BOARD

V. Aquilanti, Perugia
R. J. Bartlett, Gainesville
R. D. Brown, Clayton
J. Fried, Chicago
K. Fukui, Kyoto
G. G. Hall, Kyoto
E. J. Heller, Seattle
M. Karplus, Cambridge, Mass.
R. A. Marcus, Pasadena
M. D. Newton, Okazaki
E. E. Nikitin, Moskwa
J. Paldus, Waterloo
R. Zahradnik, Praha

SPRINGER INTERNATIONAL

Theoretica Chimica Acta

A Journal for
Structure, Dynamics and Radiation

Founded and edited in 1962 by H. Hartmann from Vol. 1 (1962) to Vol. 66 (1984).
As of Vol. 67 (1985) edited by K. Ruedenberg et al.

Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.
All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.
The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.
While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0040-5744, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Adamowicz L, Bartlett RJ, Kwiatkowski S, Person WB: Theoretical study of PO and PO^- 135
Adams BG: Application of 2-point Padé approximants to the ground state of the 2-dimensional hydrogen atom in an external magnetic field 459
Aray Y, Gomperts R, Saavedra J, Urdaneta C, Murgich J: *Ab initio* MO calculation in terms of localized orbitals of the ^{14}N electric field gradient in nitriles 279
Asai Y, Yamabe T, Fukui K: On the Hartree-Fock approximation to the electronic structure of molecule in the intense radiation field and the strong vibronic coupling 147

Barbier C, Berthier G, Daoudi A, Suard M: On the Fe—CO molecule 419
Barentzen H → Ivanov CI, et al 27
Bartlett RJ → Adamowicz L, et al 135
Bauschlicher CW Jr, Langhoff SR: Full configuration interaction benchmark calculations for transition moments 43
Berthier G → Barbier C, et al 419
Broer R, Nieuwpoort WC: Broken orbital symmetry and the description of valence hole states in the tetrahedral $[CrO_4]^{2-}$ anion 405
Buenker RJ → Fueno T 123

Chen R → Liegener C-M, et al 449
Cremona JE → Fowler PW, et al 1
Cukrowski AS, Stiller W, Schmidt R: Kinetic description of bimolecular reactions with low energy cross sections in dilute gases 67

Daoudi A → Barbier C, et al 419

Fantucci P → Polezzo S 393
Fieck G: Permutation representations in molecular symmetry 247
Fowler PW, Cremona JE, Steer JI: Systematics of bonding in non-icosahedral carbon clusters 1
Fueno T, Buenker RJ: Electronic structures of the S_2O and S_3 isomers: an *ab initio* CI study 123
Fueno T → Yamaguchi K, et al 337
Fukui K → Asai Y, et al 147

Gailitis M, Silverstone HJ: On the use of asymptotic expansions 105
Glasser ML: Electrostatic sums for polymer chains 229
Gomperts R → Aray Y, et al 279

Hall GG: Molecules with holes 425
Helgaker T → Jørgensen P, et al 55
Hobza P → Schneider B, et al 201
Honegger E: Systematic regularities of molecular SCF energies 317
Houk KN → Yamaguchi K, et al 337

Ivanov CI, Tyutyulkov N, Olbrich G, Barentzen H, Polansky OE: Structure and properties of non-classical polymers. IV. The effect of long-range Coulomb interaction on the elementary excitation spectrum 27

Jensen HJA → Jørgensen P, et al 55
Jeziorski B → Paldus J 81
Jørgensen P, Jensen HJA, Helgaker T: A gradient extremal walking algorithm 55

Kutzelnigg W: Origin and meaning of the Fermi contact interaction 173
Kwiatkowski S → Adamowicz L, et al 135

Ladik J → Liegener C-M, et al 449
Langhoff SR → Bauschlicher CW Jr 43
Liegener CM, Otto P, Chen R, Ladik J: On the electronic band structure of periodic β-pleated sheet polypeptides in the presence of water and ions 449
Lindh R → Malmquist P-Å, et al 155

Malmquist P-Å, Lindh R, Roos BO, Ross S: An *ab initio* study of the molecular structure and vibration-rotation spectrum of the triplet radical HCCN 155
McWeeny R: Classical structures in modern valence bond theory 115
Mezey PG: Symmetry and periodicity of potential surfaces: a test for multicenter interactions 221
Mó O, Paz JLG de, Yáñez M: Counterpoise estimates of the BSSE in the evaluation of protonation energies 307
Murgich J → Aray Y, et al 279

Nieuwpoort WC → Broer R 405
Noga J, Urban M: On expectation value calculations of one-electron properties using the coupled cluster wave functions 291

Olbrich G → Ivanov CI, et al 27
Otto P → Liegener C-M, et al 449

Paldus J, Jeziorski B: Clifford algebra and unitary group formulations of the many-electron problem 81
Pauncz R: Studies in the paired orbital method. II. The energy expression and its derivatives with respect to the nonlinear parameters 383
Paz JLG de → Mó O, et al. 307
Person WB → Adamowicz L, et al 135
Polansky OE → Ivanov CI, et al 27
Polezzo S, Fantucci P: An approximate frozen core approach to valence only molecular calculations 393

Subject index

Ab initio 135
Ab initio calculations 317
Activation energy 67
Alkanes 233
Alternant hydrocarbons 207
— molecular orbital method 383
— polymers 27
Annelated [*n*]annulenes 437
Asymptotic expansion 105

Band structure 449
Bloch-Nordsieck transformation 147
Boltzmann equation 67
Bonding of carbon monoxide 419
Bond orbital resonance theory (BORT) 207
— orders 207
Borel summation 105
BSSE 307

Carbon clusters 1
Chemical graph theory 233, 437
CI calculations 123
Composition 233
Configuration interaction 81,419
Conformation analysis 221
Conjugated circuits model 437
Convergence acceleration 323
Coupled cluster method 291
— -cluster theory 135
— -pair approach 81
Cross section 61

Disulfur oxide (S_2O) 123
Dressed molecular Hamiltonian 147

Effective Heisenberg exchange 27
Electron correlation 135, 383
Electron counts 1
Electrostatic energy 229
Energy compents 317
Expectation value 291
Exponentially declining atomic orbitals 323

Fermi contact interaction 173
Frozen core 393
Full CI 43

Gases 67
Gradient extremals 55
